Why Is There A God ?

- We cannot arrange balls going in every directions. Yet that's what life does. The universe can create life, unless a God.
- In the same way, individuals are the cells of the human body, just as societies are the tissues, or professions are the specialized cells.

Why Is There A God ?

- Universe is organizing itself. Einstein said that it is impossible to organize an explosion, which the universe did. So the universe should have a soul.
- The light's slightest action work confirm this soul.
- Also gravity acts in vacuum. It also confirms a soul that should be gravity, in another universe, to also lead the light.

Why Is There A God ?

- We can therefore think that God should be a soul, whom should create other souls, including ours and universe's souls, greater.
- Indeed, Luc Montagnier, the AIDS' discoverer, could recreate DNA from microwaves of our body.
- Where should these microwaves come from? From the soul surely, from another universe surely.

Why Is There A God ?

- Our mind was designed to seek the truth. We are happy because we have discovered a truth. If we give ourselves pleasure, often on the short term, it is not as happy as joy, because joy will go back in us, different, while pleasure will be forgotten, similar. This explains that our mind is not born randomly. We are created to seek the truth.

Why Is There A God ?

- A body that has got cancer, certainly due to the environment, requires external intervention to be cured.
- In the same way, external intervention should also be necessary when human society becomes disorganized. So acts the Holy Spirit, who speaks to us, as the Secrets of Fatima, as Jesus Christ.

Why Is There A God ?

- The gospels, admittedly reworked, go against all this established period's laws. These gospels, if we respect them, should make us a God. Jesus Christ therefore came to Earth to make us Gods, because he even indicated that we could join him, if we were searching the truth, if we believe in God, if we are charitable, which according to him is the most difficult to achieve.

Why Is There A God ?

- Lourdes shows that there is indeed a Holy Spirit left on Earth. Indeed, doctors cannot explain the Lourdes' miracles. On the other hand, the Holy Spirit acts only at one place, as Jesus showed, having also lived accross the center of three continents, because it seems that every soul can only act towards one goal, God included.
